Lights on & pair — All Groups — Lights off & unpair
Adjust Light quantity — Brightness — Adjust color temperature
Light Color
Nightmode — Preset — Preset color temperature
Personal Settings — Grouping — Choose group

Grouping
On the driver, select which group you want to assign the luminaires by use of the dip switches.

Pairing
Press and hold the pair button, the red light will flash quickly. While holding down the pair button, connect the luminaire to the powergrid, then release the pair button. The luminaires are now paired with the remote control. To unpair do the same with the unpair button.

Choose a group
The settings for choosing a group are matched with the settings on the driver. 1 Stands for A, 2 for B, 3 for C etc. If you want to adjust a setting for the whole group, select the group on the remote control and adjust the desired light quantity or color temperature.

Adjust color temperature
Adjust the color temperature from a minimum (2300K) to a maximum (4000K) or do this gradually

Light quantity
Adjust the amount of light from minimum to maximum or do this gradually.

Preset color temperature
Under this button fixed color temperatures are programmed, 2300K, 2700K, 3000K and 4000K.

Night mode
The night mode button sets the luminaires to the minimum brightness (2300K).

Personal settings
Set own preferences under this button. Set the luminaire to the desired color temperature and brightness and then keep the button pressed for a few seconds. The setting is then saved.
